## UK Science and Research Funding Opportunities – THAILAND

Jan 2026 – Issue 1.0

### Instructions

This document provides a summary of funding opportunities for UK researchers to collaborate with international partners, which Thailand is one of the eligible partners. UK funding opportunities are delivered across multiple departments and organisations, and the list below (**Table 1**) is not an exhaustive list. Applicants are advised to **read the guidance note** of each call in full details, which may require Co-PI from the UK and one other country, before submitting the application. For further queries, please contact relevant UK funders / delivery partners.

Please visit this page for overall **UK Official Development Assistance Funding overview**: <https://ukcdr.org.uk/uk-oda-funding-overview/>

### Summary of funding available:

- **Health**: 7 programmes
- **Climate**: 5 programmes
- **Tech**: 1 programme
- **Capacity Strengthening / Cross themes**: 8 programmes

Please note this document is **not** updated on a regular basis. You are encouraged to follow and subscribe to relevant e-newsletters for up-to-date notification (**Table 2**).

Theme	Health (Adjuvant)	Health (Vaccine)	Health (Vaccine)
<b>Programme name</b>	Develop an Open-Access ISCOM Adjuvant for Global Health	Innovations to Prepare for Future Epidemics and Pandemics	Innovative analytical technologies to improve vaccine manufacturing speed and equitable access
<b>Funder / DPs</b>	CEPI	CEPI	CEPI
<b>Expected outcomes / Brief Description</b>	To identify and support developers with the capability and commitment to advance an Immune Stimulating Complexes (ISCOMs) adjuvant from early-stage development through to Good Manufacturing Practice (GMP) readiness.	To advance a broad range of vaccine innovations for pathogens with epidemic or pandemic potential, including novel pathogens capable of infecting and causing disease in humans (i.e., Disease X). It supports vaccine research, development and manufacturing innovations	To develop innovative analytical technologies for vaccines, to reduce vaccine development, manufacturing, and release times, lower costs, improve equitable deployment, and enhance insights for vaccines such as RNA, viral vectors, or protein-based vaccines.
<b>Priority area / Scope</b>	Development of an ISCOM adjuvant using sustainably sourced saponins and other raw materials, with the aim of achieving GMP readiness for commercial scale manufacturing.	Focus Area 1: advancing innovative rapid-response vaccine platforms that can transform the response to a future Disease X  Focus Area 2: developing new vaccine candidates against CEPI priority pathogens with epidemic or pandemic potential and viral families	Focus Area A: Minimising time/cost to release/develop vaccine  Focus Area B: Vaccine characterisation
<b>Budget</b>	5m USD	Varies from 1m-5m USD depending on scope	Stage 1: 200k USD Stage 2: 800k USD
<b>Duration</b>	3 years	18 – 36 months depending on scope	Stage 1: 12 months Stage: 18 months
